

## RZ Series Vibration Hour Meters

The RZ Series Vibration Hour Meters record the running time of machines, vehicles, and equipment, which vibrate during operation. The automatic mechanism in this meter converts vibrations into energy, which drives the hour meter and minute hand. It is uniquely sensitive and capable of operating from a slight vibration, such as a moving car.

### Features

- No wires, no cable
- Horizontal and vertical installation
- Activated by vibration
- Front panel is dustproof and waterproof

### Ratings

Dimensions:

(H x W x D) RZ 52/60/52D	Ø 58 x 75/65 x 75/80 x 75 mm
Panel Cutouts:	Ø 52/60/71 mm
Mounting Depth:	67.5/69/59 mm
Weight:	145g/185g (RZ-D)
Ambient Temperature:	5°F to 140°F (-15°C to 60°C)
Protection Quality:	IP 65, front panel is dustproof and waterproof
Moving Force:	Vibration and energy transformer
Accuracy:	+/-3% at uninterrupted operation
Counting Range:	99,999 hours
Mounting/Installation:	Wall mounting
Mounting Position:	RZ 52 H to 45° RZ 52 V to 45°

### Ordering Information

RZ52 = Model Reference (listed below)

D = Rubber Mounting

H = Horizontal Installation

V = Vertical Installation
