1. Telephone protection is compatible with Voice and Fax lines, Modem lines and DSL (Digital Subscriber Lines.)
2. Coaxial protection is compatible with Local antenna, Cable/Satellite and Cable Internet lines.

### Before Installing

1. This device is intended for surface mounting. If unit is to be flush mounted (inside of wall) make sure that you have the FLUSH MOUNTING KIT, part number **IGFLUSH**.
2. Check the parts in the package against the Parts List shown above. Contact Intermatic if parts are missing.
3. It is suggested that you read these instructions completely before installing the Stand Alone Protection (SAP) unit.

**Note:** These modules rely on a good ground connection to function properly. Ground availability should be a consideration when selecting an installation location.

**Do not install Protection Devices during Electrical Storms.**
